

National Minority Technology Council

TM

Building Trusted Networks™

nmtcsm

The National Minority Technology Council is the primary source for market research on minority technology companies in the US. The Council serves as a single point of contact for both policy and procurement issues.

Our goal is to daily advocate and facilitate new initiatives that create and expand business opportunities for our members.

The core purpose of the National Minority Technology Council is to help its members become more profitable and successful. The Minority Technology Industry is a vibrant, fast growing and viable business segment.

The Minority Technology Industry's combined annual revenue is estimated at over \$100 Billion. Our belief is there is strength in numbers; when there is trust and collaboration.

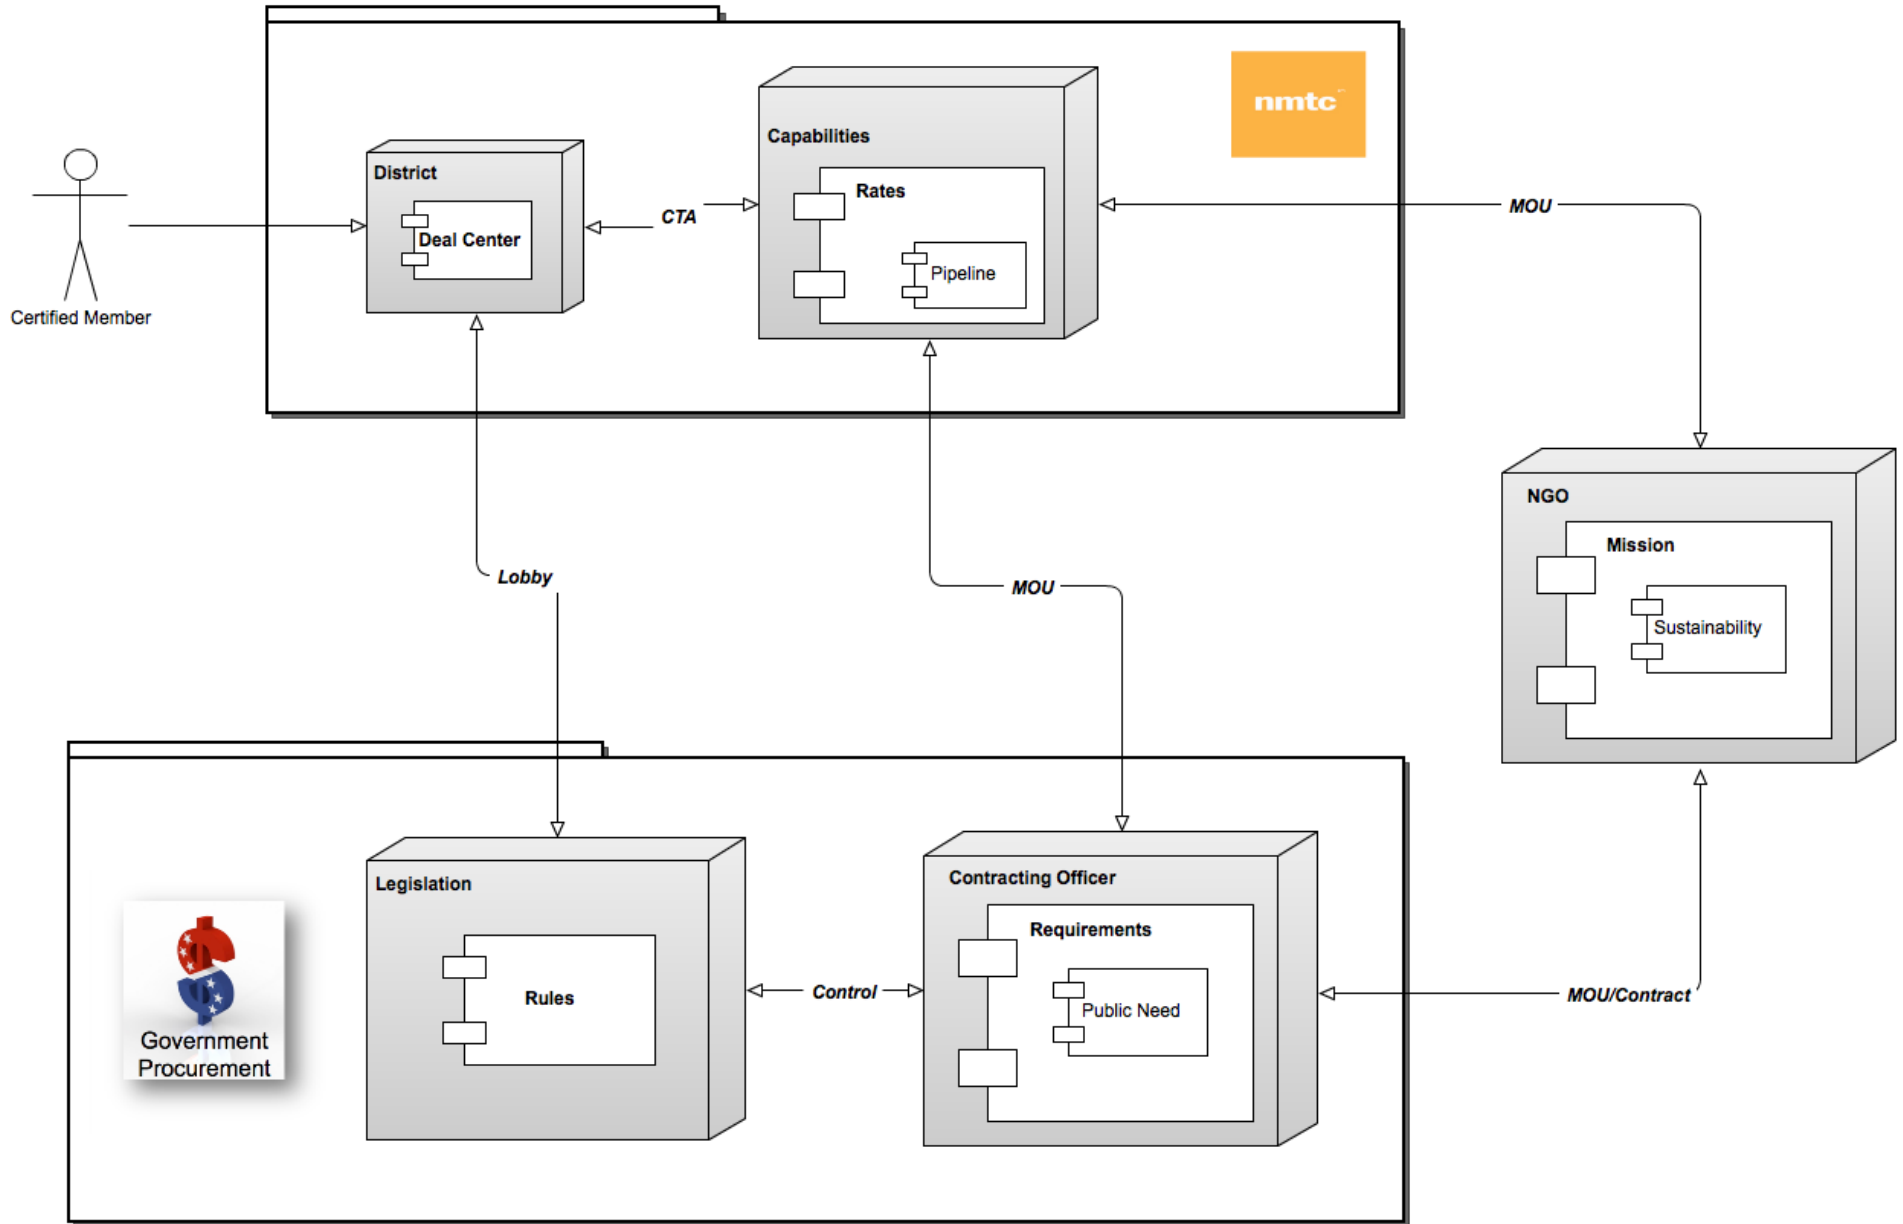

As a 501c6 trade association we are highlighting Minority Technology companies from over 30 different states and 40 districts.

The US census has surveyed and reported that of the over 5.8 million minority businesses in the US 65,000 are both minority owned companies working in a technology related fields and employers.

The Council is tracking over 9,000 minority technology companies located in our over 40 Districts nationwide

National Minority Technology Council Certification and Collaboration Ecosystem

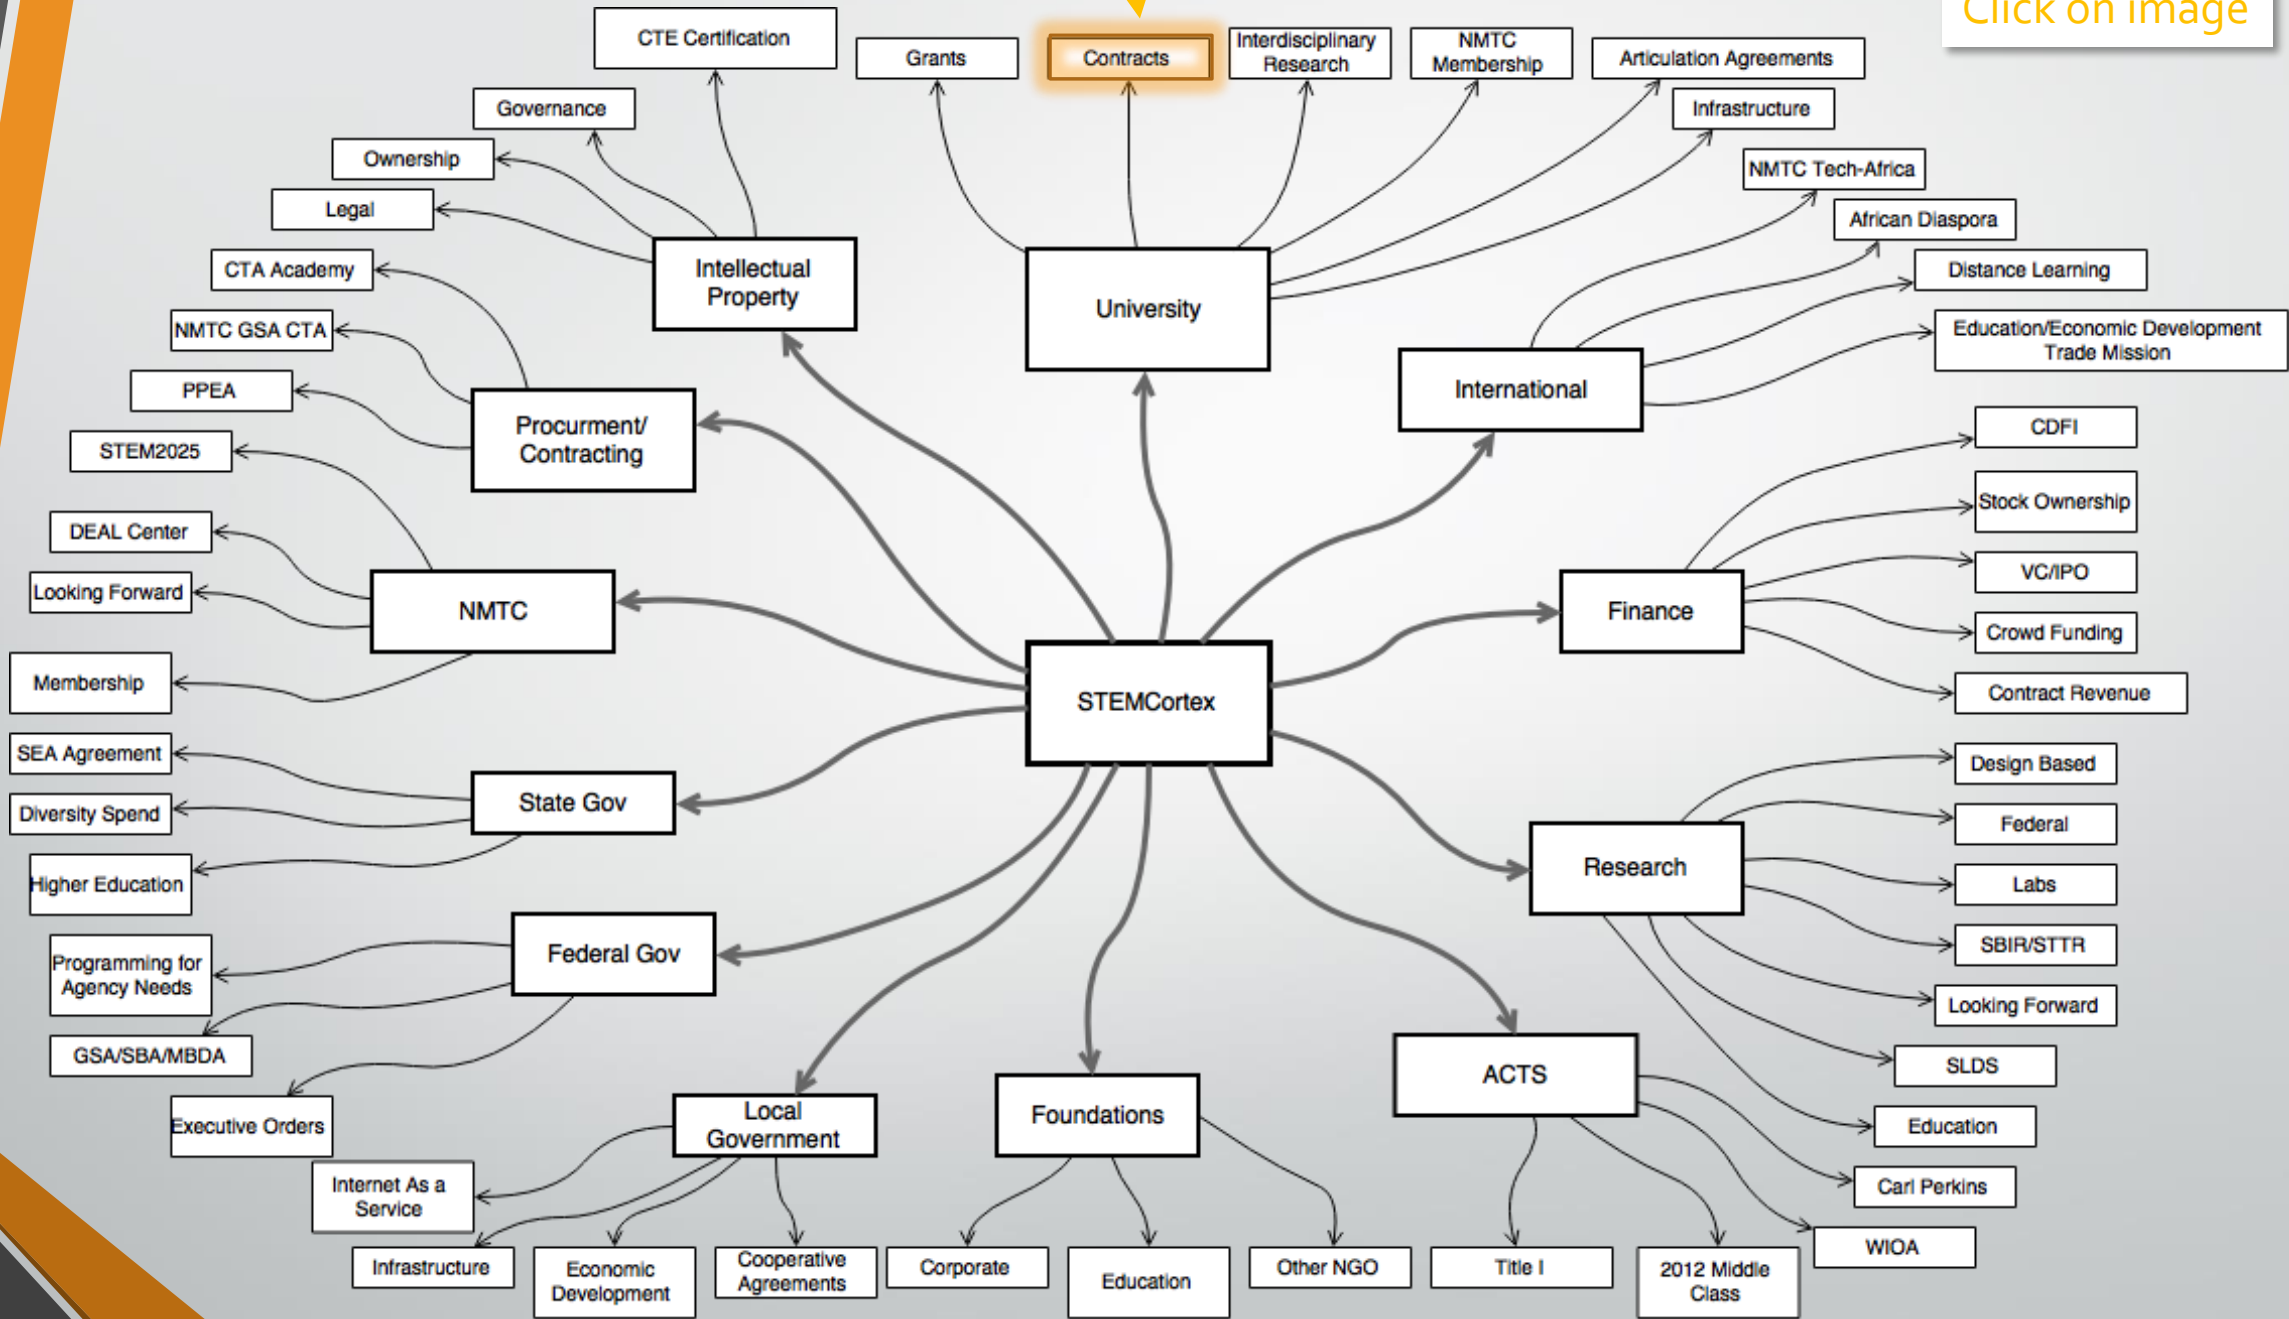

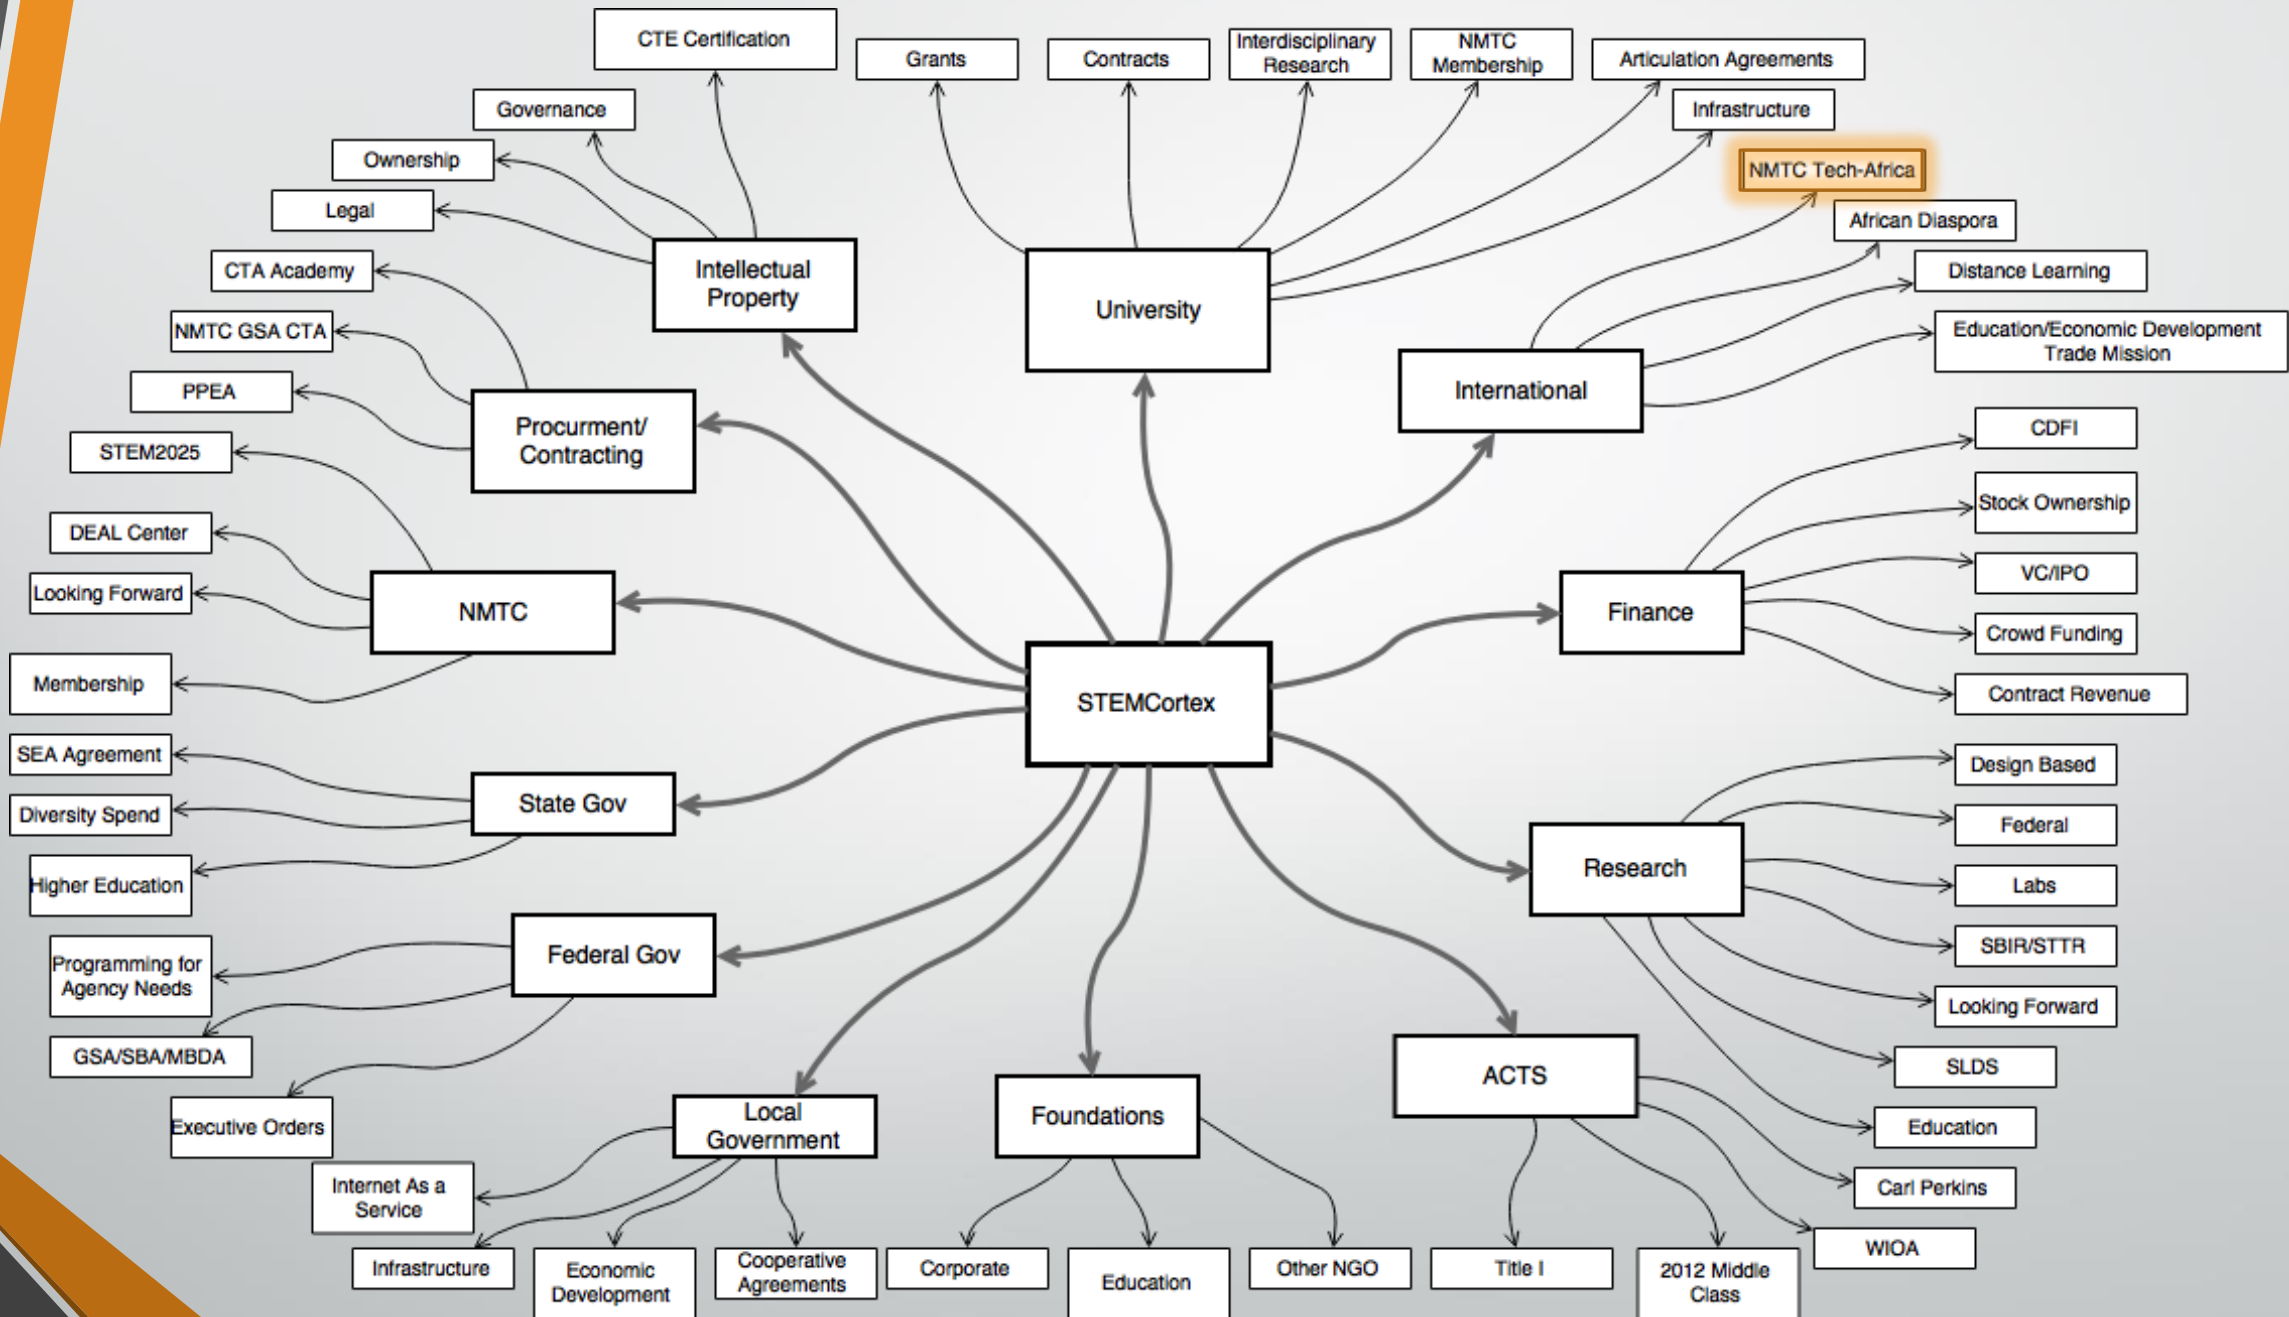

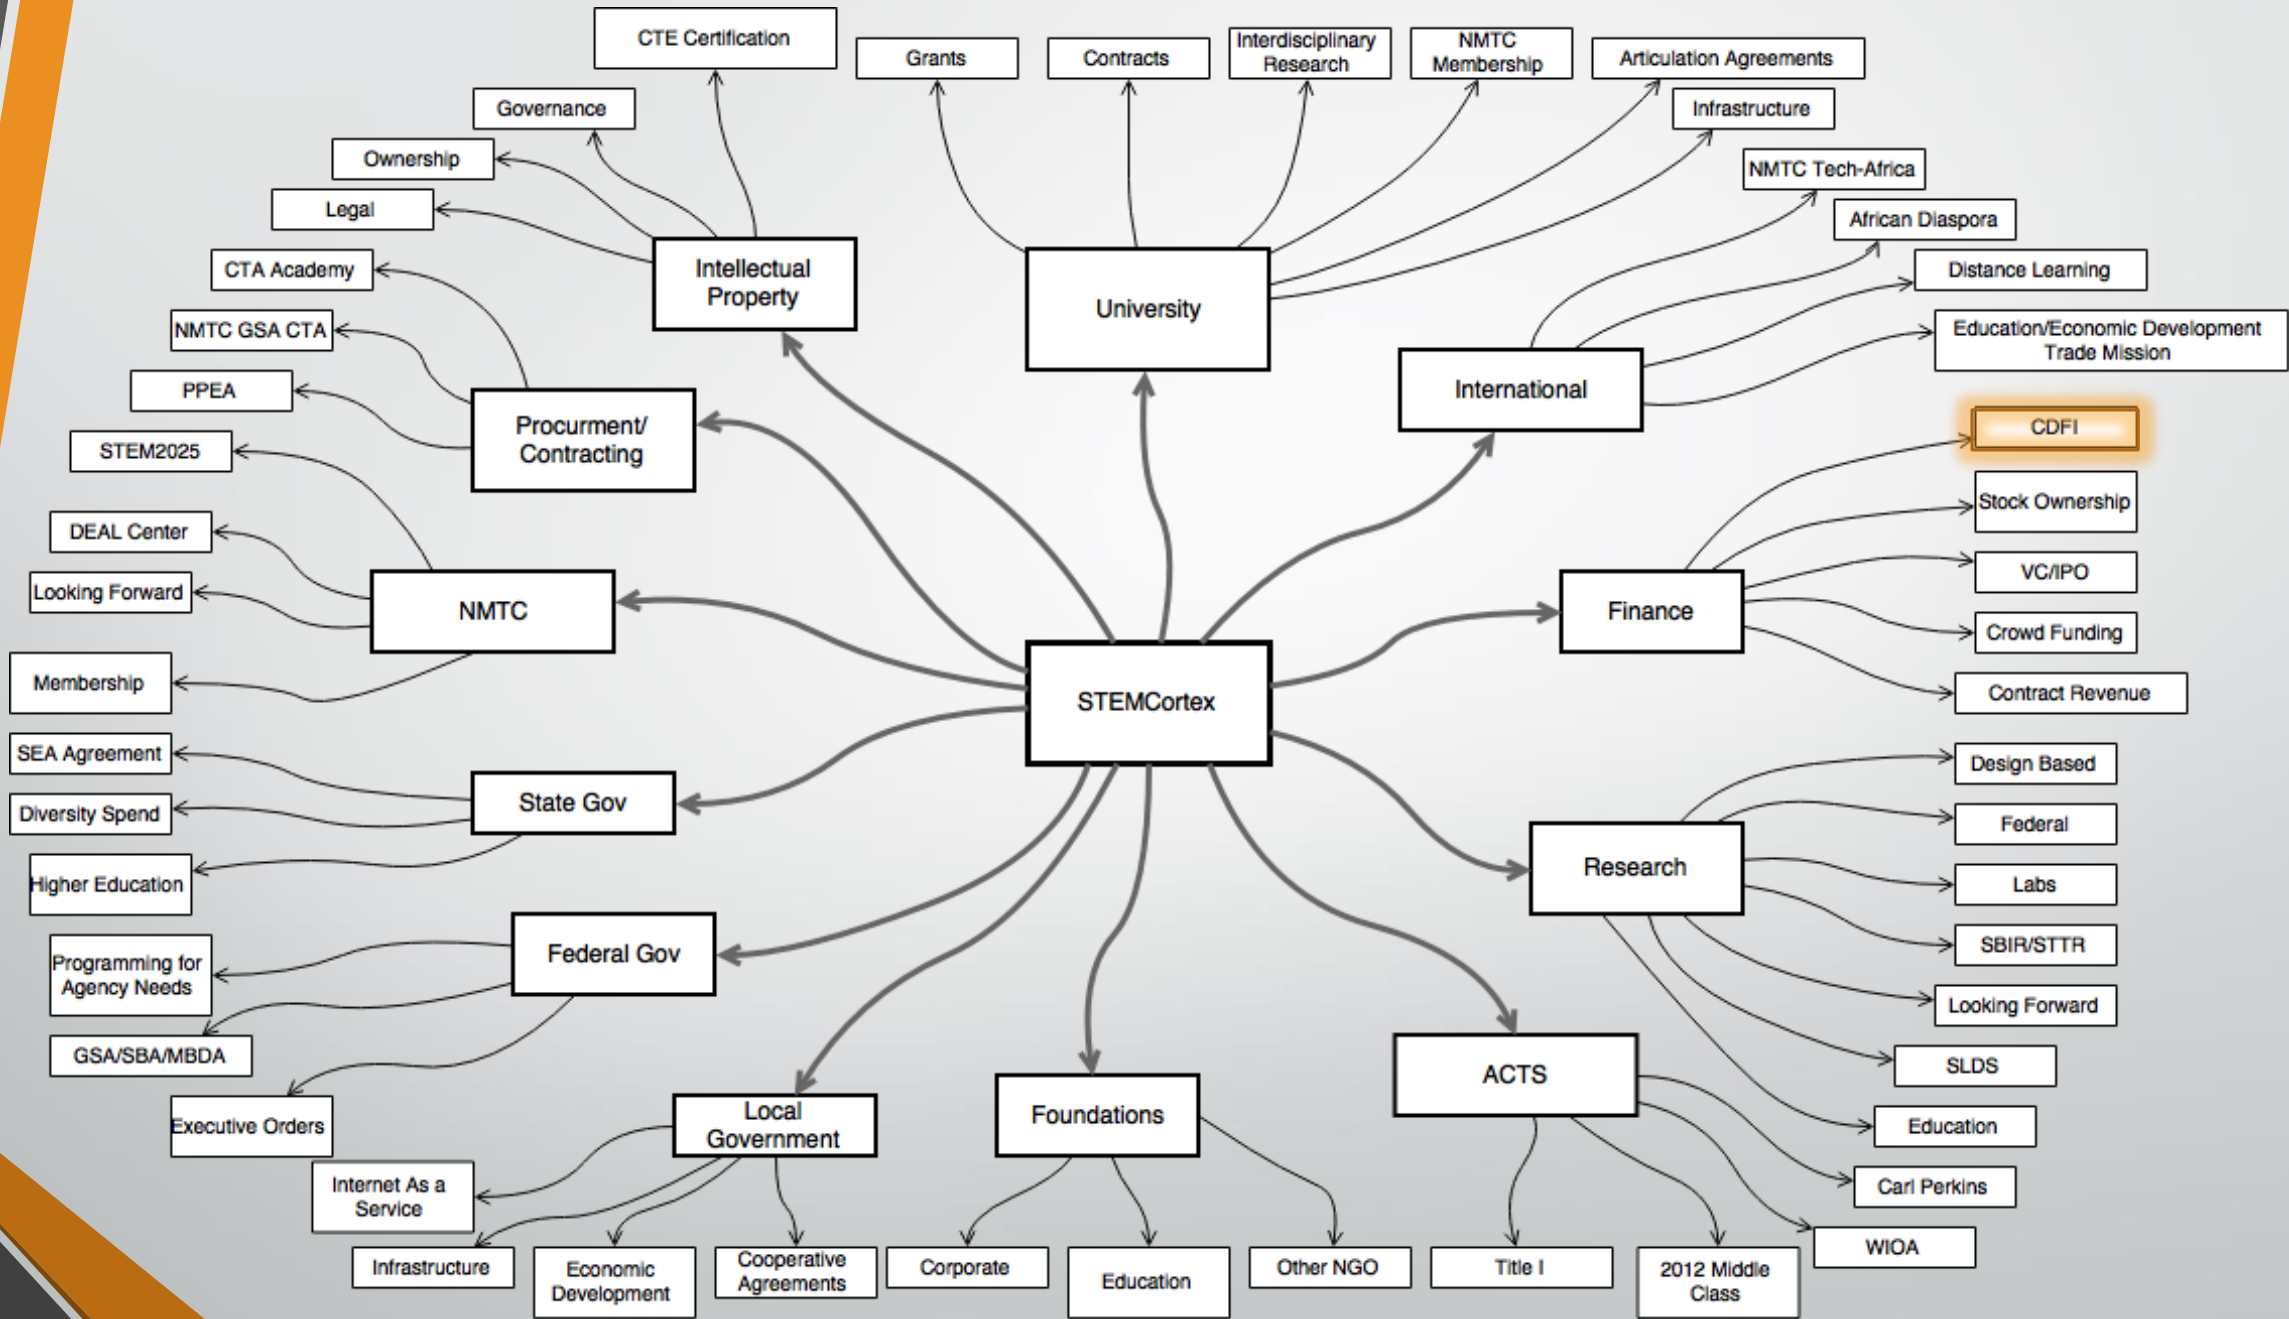

STEMCortex Mind-Map

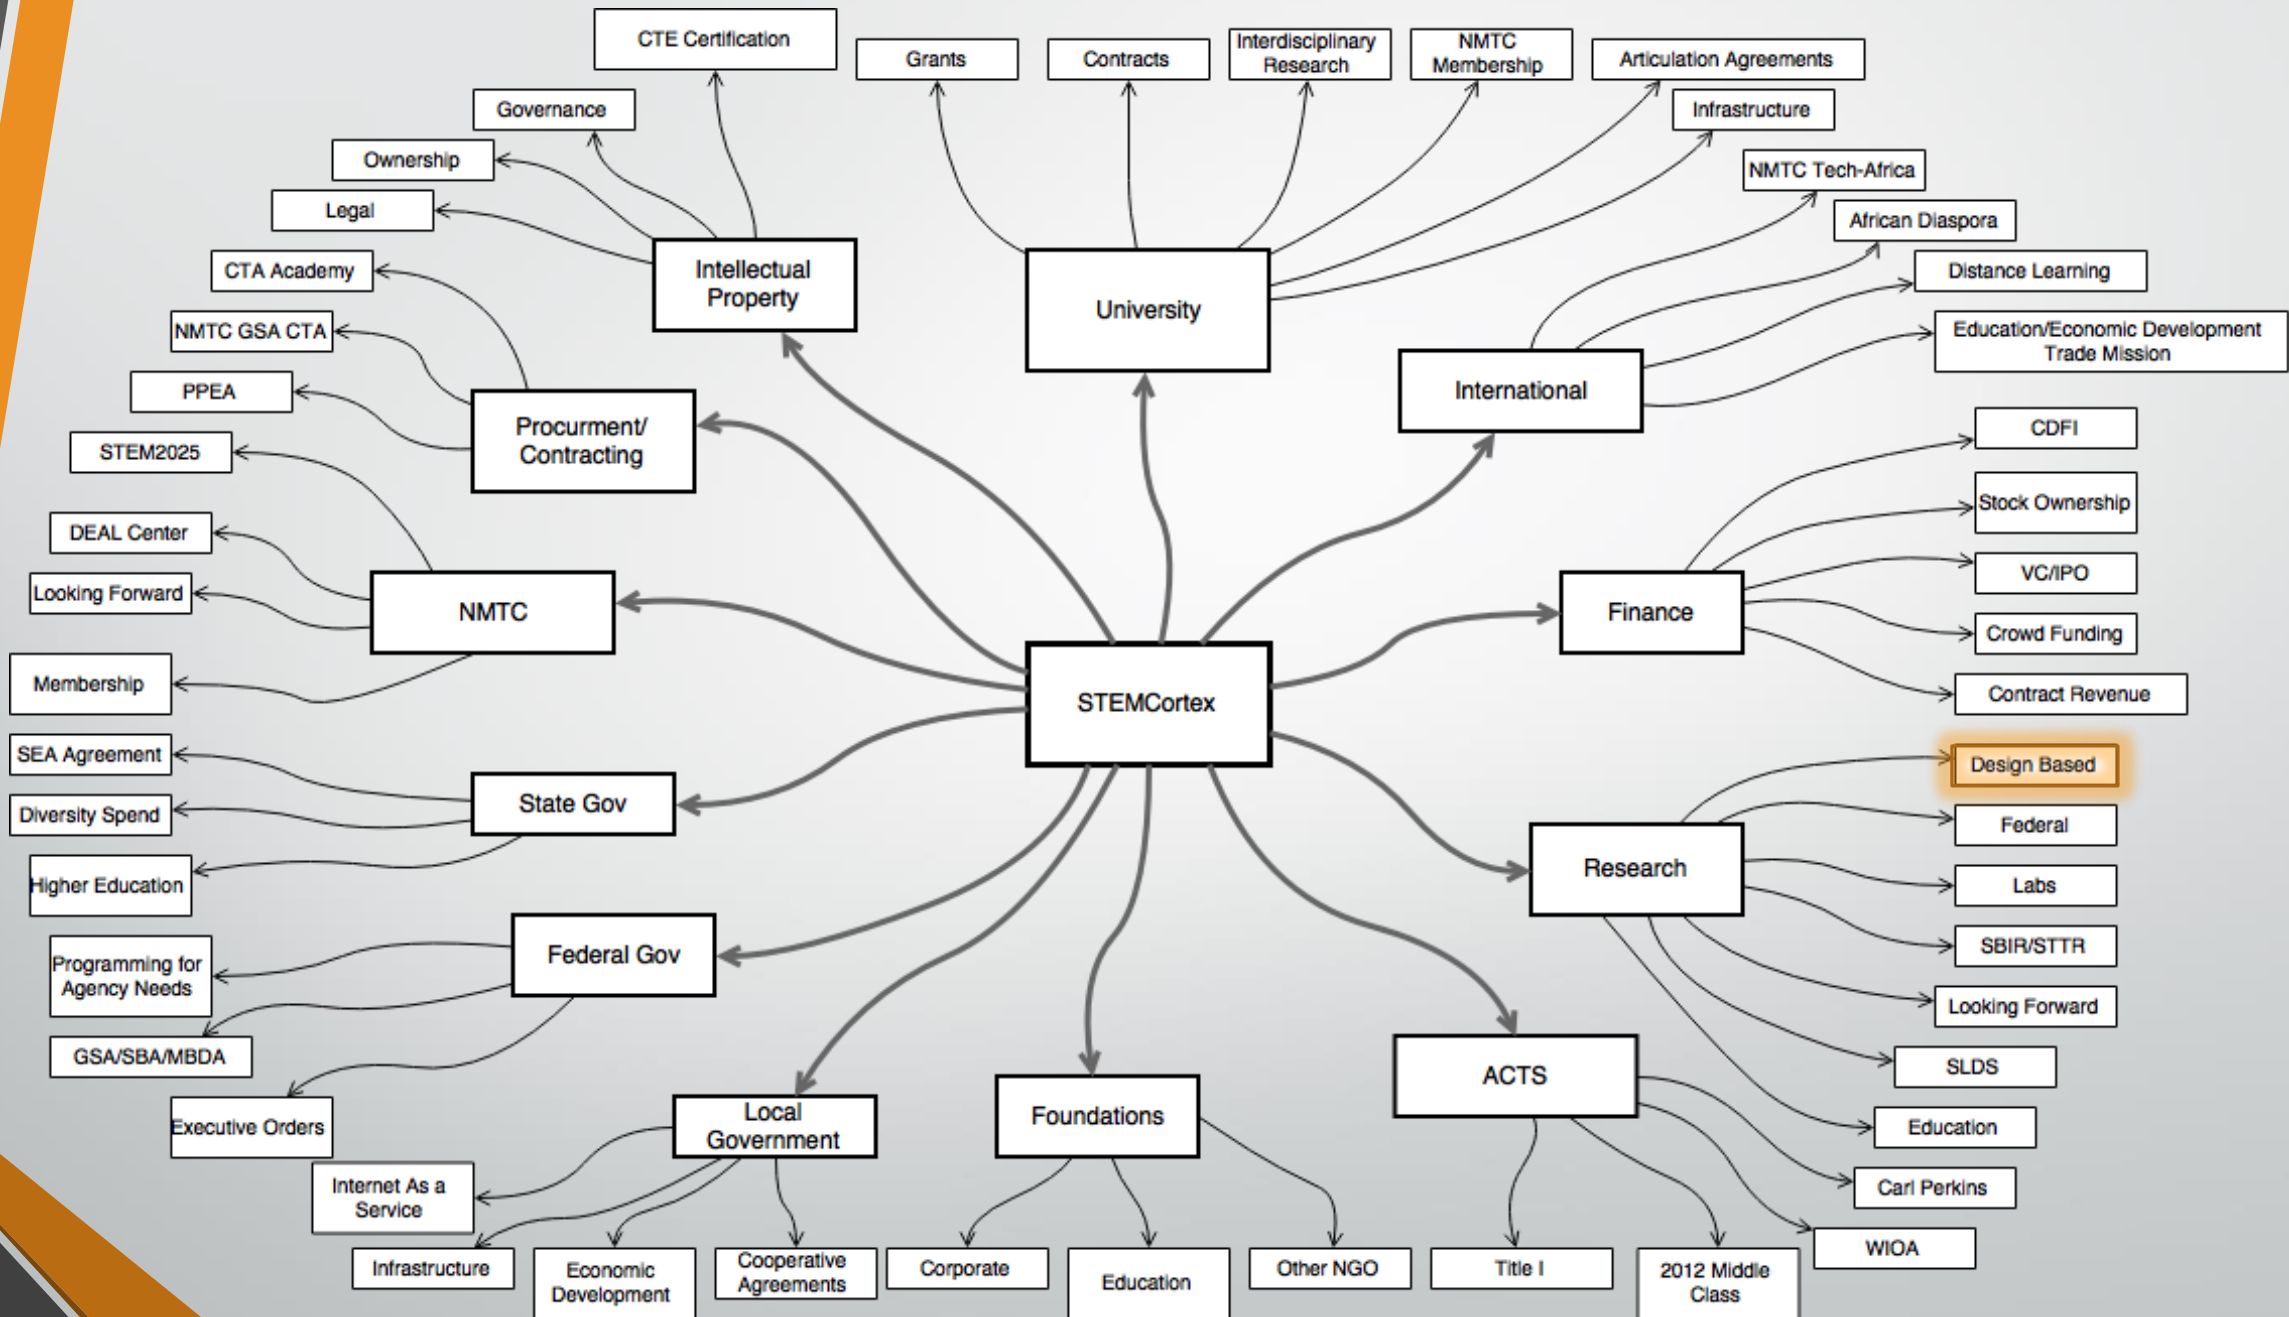

The National Minority Technology Council has developed 50 points of inflection based on both research and program development. These strategies are identified below, some are detailed through a link to more information.
